Interim Guidelines for use of FRP elements within ship structures: Fire Safety Issues
-Adopted June 2017

Review after four years - to make amendments based on experience from application

E-LASS – a JIP platform?

JIP = Joint Industry Project (without public funding)

Solving industry challenges together - new solutions, standards, best-practice, etc.

Small scale projects on material innovation can be initiated and run, e.g. in-between E-LASS meetings.

At the next E-LASS, we will launch the concept of E-LASS as a JIP platform, organizing small workshops to discuss specific challenges.

Challenges

Before the meeting, please submit challenges which you have interest to investigate – can also be provided on site!
